Fields for development of ports in urban areas

- **Transforming ports into energy hubs**
 - Energy storage
 - Refilling & refuelling stations also for public transport & public utility vehicles
 - On-shore power supply
- **Electrification of port equipment and vehicles**
- **Function as logistics hub and starting point for last mile solutions (e.g. packages)**
- **Tourism – sightseeing – public transport**
- **Digitalisation – port community system(s)**
